

How to replicate the work?

1. I highly encourage the peers to replicate the work I have done.
2. The main notebook is `calibrate_ou_process.ipynb`
3. The measurement of realized volatility is in `vol_utils.py`

FAQ

Where is the code?

Clone this Github Repo:

```
https://github.com/piper-of-dawn/WQUCapstoneOptionsTrading
```

Where will I get the data?

The data is in Gigabytes and I cannot put it on Git. It is hosted publically on my Google Drive.

LINK: https://drive.google.com/file/d/1n4KeK6EylbFXEB41mc9ksfm_up9dED-P/view?usp=sharing

Make sure the data is stored in a folder called DATA (all capitals) in the root directory of the project.

What libraries do I need to install?

```
pip install numpy plotly polars tqdm matplotlib scipy
```
